

Abstract

- Purpose of the work
- Method/approach
- Key findings
- Major conclusion

I. INTRODUCTION

Explain:

- Background of the study
- Problem statement
- Motivation
- Objectives
- Contributions

II. LITERATURE REVIEW / RELATED WORK

- What methods they used
- What gaps exist
- How your work differs

III. METHODOLOGY / PROPOSED SYSTEM

Detail:

- Dataset description
- Preprocessing
- Algorithms / models used
- System architecture
- Formulas, diagrams, figures
- Pseudocode or workflow diagrams

C. Comparison of Model

Table 1 summarizes the performance of all three models.

IV. RESULTS AND DISCUSSION

Include:

- Tables and graphs of results
- Comparisons between models
- Discussion of why results are good/poor
- Accuracy, precision, recall, F1-score (if ML task)

Tables are labelled like:

Table 1: Comparison of Model Performance

V. CONCLUSION AND FUTURE WORK

Summarize:

- What you achieved
- What results indicate
- Limitations
- Future improvements or extensions

ACKNOWLEDGMENT (*optional*)

Thank any organization, advisor, or dataset source.
